VALERY LAVROV

Independent Developer · AI-Assisted Product Builder

Israel | +972 54-332-8803 | valerynz@hotmail.com | lavrov-dev.com | linkedin.com/in/valery-lavrov | github.com/ValeryKG

PROFESSIONAL SUMMARY

Independent developer who builds complete products solo, with AI assistance. I own the problem definition, architecture, data model, security rules, multilingual UI and deployment; Claude writes code under a written session protocol, and I review and commit every change. Eight live applications used by real people across facilities, workforce management, sports, family and building management. 15+ years building websites and software.

Core stack: React · TypeScript · Firebase · Node.js · Firestore · PWA

SELECTED PROJECTS

FixDesk — Facilities ticketing & reporting platform
fixdesk-a3e40.web.app

- Forked from StockPilot's ticket system and rebuilt to fit Palo Alto Networks' facilities operation after its acquisition of CyberArk.
- Dashboard splits team-controlled handling time from externally-gated wait time (contractor, parts, manager approval) — so a delay outside the team's control doesn't read as team failure.
- Reports for management and cross-department visibility: resolved/open/in-progress/on-hold counts, top locations, longest-waiting items grouped by reason.
- Customer self-service portal — exact location, photo, and contact captured at submission.
- Live and in daily use by the Petah Tikva facilities/maintenance team.

StockPilot — Facilities inventory & maintenance platform
inventory-e5daa.web.app

- Originally built for CyberArk's inventory, reordering, and asset-tracking workflow.
- Immutable audit trail, PDF/Excel reports, atomic stock-change logging, serial-number asset tracking with one-tap inspection.
- Full data export for AI analysis — paste a snapshot into any AI tool and ask questions in plain English.

CoachIQ — AI basketball coaching platform
coach-iq.org

- Conversational RAG agent (Pinecone, Anthropic models via Cloud Functions) grounded in NBA, NCAA, EuroLeague and FIBA methodology plus 20+ years of my own coaching knowledge; reads the individual player's history before answering.
- Player, coach, parent and assistant-coach roles; paid subscriptions (Paddle) live.

TimeClock GPS — GPS time-tracking SaaS

- Multi-tenant. Device-level fraud prevention with an approval queue, a neutral observer role, an accountant dashboard and automatic anomaly flagging. Hebrew-first, four languages.

Also built and live: WishBasket (family household coordination), Baiti (building management for residents and committees), MyHours (personal hours and earnings tracker), CourtIQ (basketball player development). All are installable PWAs, in up to four languages (Hebrew, Russian, English, Arabic). Full portfolio at lavrov-dev.com.

METHOD

- Maintains a cross-project knowledge base of 50+ documents (architecture decisions, Firestore security rules, auth, PWA, payments, RAG) that is read before every build.
- AI-assisted workflow: requirements, architecture and acceptance are mine; code is generated by Claude Code and every change is reviewed and committed by me.

SOFTWARE & WEB EXPERIENCE

Independent Developer — websites, Android and web applications
2009 – Present

- Websites for small businesses: development, hosting, maintenance and online promotion (Israweb4u, since 2009).
- Native Android apps in Java and, later, Kotlin.

- Production web applications end to end: architecture, security rules, multilingual/RTL support, payments, hosting. Since 2025 with AI assistance: production apps in weeks instead of months.

Founder — VR-Israel
2019 – 2020
- Started a business offering virtual-reality systems to the Israeli market.

Java Developer — Unlimited Capital Ltd
2010 – 2012
- Designed and built a Java EE enterprise web application: member registration, warehouse and order processing, admin dashboard.

Computer Service Technician — Golf Computers / Skornik Security
2005 – 2006
- Hardware assembly, fault diagnosis, repair and front-line customer service.

EDUCATION & CERTIFICATIONS

- Oracle Certified Professional — SQL, PL/SQL (98%), Java SE / J2EE (93%)
- Master's Degree, Physical Education and Sport Science — Tavrian National University (1997–2003)

LANGUAGES

English (fluent) · Russian (native) · Hebrew (conversational)
