

VALERY LAVROV

Facilities & Maintenance Technician — Lod

Lod, Israel | +972 54-332-8803 | valerynz@hotmail.com

PROFESSIONAL SUMMARY

Facilities and maintenance technician with 4+ years of hands-on experience maintaining large, complex high-tech premises (12-floor office building, 1,000+ employees) at Palo Alto Networks (formerly CyberArk). Skilled with power and hand tools; proven at finding and fixing electrical, mechanical, light plumbing, carpentry and drywall faults, running preventive maintenance rounds and assembling complex furniture. 20 years as a basketball coach bring leadership, strong communication, calm under pressure and real-time problem solving. Experienced in supervising external contractors (technicians, plumbers, fire-safety), inventory, ordering and service-ticket systems. Self-driven, service-minded and ready for physical work.

KEY SKILLS

- **Power and hand tools:** daily professional use of drills, drivers, grinders and saws for repairs, installations and drilling.
- **General maintenance and office equipment:** coffee machines, microwaves, dishwashers, fridges, toasters, locks and doors, office furniture and electric height-adjustable desks.
- **Drywall, fittings and installations:** drywall and paint repairs, mounting whiteboards, pinboards, pictures and TV brackets, full assembly and disassembly of complex office furniture.
- **Electrical and mechanical:** finding and handling basic electrical faults, resetting breakers and panels in electrical rooms, replacing all lighting types, door alarm testing.
- **Rounds and preventive maintenance:** periodic and daily rounds to confirm building systems are working; supporting safety and fire inspections; strict safety procedures.
- **Contractors and inventory:** monthly consumables inventory (paper, air fresheners, soap), ordering, goods receiving, close supervision of technicians, plumbers and external contractors.
- **Computers and systems:** good working command of Office, daily work with service-ticket systems, and built a digital inventory and maintenance-budget system (StockPilot).

EXPERIENCE

Facilities Technician — Palo Alto Networks (formerly CyberArk), Petah Tikva

2022 – Present

- Daily maintenance and preventive supervision rounds in a 12-floor office building with 1,000+ employees.
- Extensive use of power and hand tools for installations, drilling, building repairs, furniture assembly and mounting fixtures.
- Fault finding in infrastructure, replacing light fixtures, handling electrical panels and breakers, door alarm tests and light plumbing.
- Full responsibility for kitchenette equipment (coffee machines, dishwashers, fridges, microwaves), ordering supplier service when needed.
- Answering daily service requests: furniture assembly, adjusting electric desks, repairing locks and doors, drywall repairs, hanging equipment.
- Close supervision of external technicians, plumbing contractors, fire-safety technicians and official inspections.
- Monthly inventory of building consumables: purchase orders, goods receiving and distribution by floor.
- Daily work with a digital service-ticket system; reporting and tooling to track assets, stock and maintenance budget.

Basketball Coach — Hapoel Lod and other clubs, Israel / abroad

2004 – Present

- Started as a player-coach and assistant coach in Modi'in, later head coach. 20 years leading teams and managing sports programs: discipline, steady communication, strict schedules.
- Fast decisions under pressure, conflict handling, high service and interpersonal standards.
