

VALERY LAVROV

Full-Stack Software Engineer

Israel | +972 543 328 803 | valerynz@hotmail.com | lavrov-dev.com | linkedin.com/in/valery-lavrov | github.com/ValeryKG

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a product-first approach — I look for the operational problem before I write code. Multiple production applications built solo, end to end: architecture, data modeling, security, deployment. Real users, real daily usage, not side projects. Background also includes 20+ years as a professional basketball coach, applying systematic, data-driven analysis to team performance.

Core stack: React · TypeScript · Firebase · Node.js · Firestore

PROJECTS

StockPilot — Facilities inventory & maintenance platform
inventory-e5daa.web.app

Built after identifying a gap firsthand at CyberArk — spreadsheets and WhatsApp, no shared system, nothing traceable. Now in active daily use by the facilities maintenance team there. Multi-tenant PWA with plain-English querying over live data, atomic and permanently logged stock changes, and a customer portal for occupants to submit and track requests in real time.

CoachIQ — AI-assisted athletic development platform
coach-iq-6bd7c.web.app

Built for individual athlete development across NBA, NCAA, EuroLeague, and FIBA methodology. Before generating a response, the system reads the specific player's training history, physical state, and coach notes — so the same question gets a different answer depending on who's asking and what they're carrying into that session. Active development, subscriptions live.

Four more live products — TimeClock GPS, WishBasket, CourtIQ, Baiti, MyHours — full portfolio at lavrov-dev.com

WORK HISTORY

Full-Stack Developer — Independent

2017 – Present

Designed, built, and shipped multiple production applications across workforce management, inventory, family logistics, sports analytics, and building management. Full lifecycle ownership: architecture, security rules, multilingual/RTL support, deployment. Maintains a cross-project knowledge base of architecture decisions and patterns carried forward from every build.

Facilities & Maintenance Specialist — CyberArk

2022 – Present

- In-House Software Creator: Identified operational gaps in asset and maintenance tracking; conceptualized, built, and deployed StockPilot.
- System Adoption: Delivered a multi-tenant PWA now in daily production use by the facilities organization, replacing spreadsheets and untracked communication.

Head Basketball Coach — Hapoel Lod & Regional Programs

2017 – Present

Applies statistical modeling to shot efficiency, pick-and-roll coverage, and player development. Leads team operations and tactical decision-making.

Java Developer — Unlimited Capital Ltd

2010 – 2012

Built a Java EE enterprise application: member registration, warehouse/order processing, admin dashboard.

EDUCATION & CERTIFICATIONS

Oracle Certified Professional — SQL, PL/SQL (98%), Java SE / J2EE (93%)

Master's Degree, Sport Science — Tavrian National University

Licensed Basketball Coach — Wingate Institute, Tel Aviv University

LANGUAGES

English (Fluent) · Russian (Native) · Hebrew (Conversational)

LEGACY

Java SE/EE, Servlets, JSP, EJB, Oracle SQL/PL/SQL (Oracle Certified — see above)
