

VALERY LAVROV

Independent Product Developer

Lod, Israel | +972 543328803 | myisramail@gmail.com | github.com/ValeryKG | linkedin.com/in/valery-lavrov-72427571

Portfolio: <https://portfolio-a772e.web.app>

PROFESSIONAL SUMMARY

Independent product developer with 25+ years of IT experience. I conceive, design, architect, and ship complete production applications solo — owning the full product lifecycle from user experience and feature logic through data architecture, legal compliance, and deployment. I work with AI-assisted development as a core part of my process, which allows me to operate at a scope and speed that would otherwise require a team. The ideas, product decisions, architecture, and quality bar are entirely mine. Background spans Java enterprise development, React/TypeScript/Firebase, entrepreneurship, Oracle/Java certification, and professional sports coaching. Fluent English, native Russian, conversational Hebrew.

FEATURED PROJECT

CourtIQ — Basketball Player Development Platform

React 18 · TypeScript · Firebase · Tailwind CSS v4 · PWA · Recharts

Full-stack sports management platform with three user roles (Player, Coach, Manager). Real-time skill tracking, session logging with per-skill stats and ratings, scouting reports, scheduling with conflict detection, ROI analytics, progress charts, a 176-skill library, and community feed. Full legal compliance — Terms of Service, Privacy Policy, consent tracking with versioning.

Key highlights:

- Role-based authentication with invite-code registration
- Real-time Firestore listeners across all dashboards
- PWA: service worker, auto-update, offline support
- Fully responsive — mobile-first for coaches, wide-screen for managers
- Complete legal framework — ToS, Privacy Policy, multi-jurisdiction consent tracking

TECHNICAL SKILLS

Frontend	React 18/19, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite
Backend & Cloud	Firebase (Firestore, Auth, Hosting, Functions, Storage), Node.js, Java SE/EE, JSP, Servlets, JDBC, EJB
Databases	Firebase Firestore, Oracle DB, MySQL, SQL, PL/SQL
PWA & Offline	Service Workers, IndexedDB, Web Manifest, offline-first architecture, auto-update systems
APIs & Libraries	Browser Geolocation, Haversine formula, jsPDF, SheetJS (xlsx), Recharts
Auth & Security	PIN + bcrypt hashing (server-side via Firebase Functions), device fingerprinting, RBAC, session management
i18n	i18next — English, Hebrew (RTL), Arabic (RTL), Russian
Tooling	Git/GitHub, VS Code, Firebase CLI, ESLint, TypeScript strict mode
Media & Creative	DaVinci Resolve, Fusion (compositing/VFX), Adobe Photoshop, Adobe Premiere
Digital Marketing	Facebook Business/Ads Manager, Google Ads

ALL PROJECTS (2022 – 2026)

CourtIQ — Basketball Player Development Platform

React 18 · TypeScript · Firebase · Tailwind CSS v4 · PWA · Recharts

See Featured Project above.

TimeClock GPS — Enterprise Workforce Management System

React 19 · TypeScript · Firebase · bcrypt · GPS/Geolocation · i18next (~18,600 lines across 26 components)

Production workforce clock-in/out system for multi-company, multi-site environments. Seven user roles, five configurable GPS approval modes, real-time worker status monitoring, device security workflow, and full payroll reporting.

- PIN authentication with bcrypt hashing + IndexedDB device fingerprinting
- Device approval workflow — new devices require manager authorization before use
- GPS distance validation using Haversine formula, configurable radius per site
- Five approval modes: auto-approve, GPS check, hours range, expected-hours, strict shifts
- Multi-company admin panel with 7-year data retention compliance
- PDF and Excel export with multi-language column headers; 4 languages including RTL

MyHours — Personal Time Tracker

React 18 · TypeScript · Firebase · IndexedDB · jsPDF · xlsx

PWA for freelancers and employees. Multi-workplace management with GPS auto-detection, hourly rates, overtime multipliers, and time rounding (8 settings per workplace). Multi-currency support (ILS, USD, EUR, GBP, RUB), PDF/Excel payroll reports, 4 languages with RTL, offline clock-in/out with automatic background sync.

Building Manager App — Property Management System

Firebase Functions (Node.js) · Firebase Firestore · HTML/CSS/JavaScript

Property management web app: payment tracking, tenant admin panel, lease date calculations, user management. Firebase Cloud Functions backend. Developed through 30+ iterations from prototype to production.

Basketball Coaching Resource Library

HTML5 · CSS3 · JavaScript · JSON-LD

Suite of 15+ interactive coaching modules: defensive systems, shooting analytics, pick-and-roll, zone defense, transition offense. SEO-optimized with JSON-LD structured data and copyright protection.
