PROFESSIONAL SUMMARY

Six production apps shipped solo in three years, while working full-time. 83,000+ lines of code across workforce management, inventory control, building management, and sports analytics. I conceive, design, architect, and deploy complete products — owning the full lifecycle from user experience and data architecture through legal compliance and deployment.

I use AI-assisted development as a core part of my process, which allows one person to operate at team-scale scope and speed. The ideas, product decisions, architecture, and quality bar are entirely mine. This process is backed by a 24-document personal methodology library — decision trees, architecture decision records, PWA guides, and session protocols — built from real production failures across 6 projects and applied to every subsequent build.

Background spans Java enterprise development (Oracle Certified, 93%/98%), React/TypeScript/Firebase, web agency ownership, and 20 years as a professional basketball coach — where I applied data analytics and systematic planning to a field most people treat as pure intuition. Fluent English, native Russian, conversational Hebrew.

FEATURED PROJECT

TimeClock GPS — Enterprise Workforce Management

React 19 · TypeScript · Firebase · bcrypt · GPS/Geolocation · i18next · ~18,600 lines · 31 calendar days, evenings only

- GPS-verified workforce clock-in/out for multi-site organizations — 6 user roles, 7 dashboards
- PIN authentication with bcrypt hashing + IndexedDB device fingerprinting; manager must approve each new device
- Five GPS approval modes: auto-approve, GPS check, hours range, expected-hours, strict shifts — configured per site
- Observer role: neutral third party sees all data — eliminates payroll disputes through shared, uneditable truth
- PDF and Excel payroll export with multi-language headers — 4 languages including full RTL support
- Offline-first: clock-in/out queues locally and syncs automatically on reconnect via IndexedDB

ALL PROJECTS (2022 – 2026)

WishBasket — Family Home Management · [wishbasket.app](#)

React 19 · TypeScript · Firebase Firestore · i18next · jsPDF · PWA · ~9,100 lines · ~2 weeks, evenings

Family inventory and accountability app built around the Wish Basket: any member requests an item, any other member claims it and owns the outcome — name recorded, result logged permanently and immutably at the Firestore rule level. Two-stage Request & Promise flow (pending → promised → resolved) with promisedBy + promisedAt tracked separately. Folder-level ACL with zero per-item query overhead. Custom org-defined statuses. Kosher/halal tracking baked into the data model. Full Shopping Mode overlay. PWA install prompt handled for both Android (native) and iOS (manual guide fallback). 3 languages with RTL.

StockPilot — Team Inventory Management · [inventory-e5daa.web.app](#)

React 19 · TypeScript · Firebase · Zod · Recharts · ~7,900 lines · ~2 weeks, evenings

Multi-role inventory system separating consumables from assets. Assets carry serial number, assignment, and repair status (working / needs_technician / decommissioned). Automatic low-stock alerts via per-item minThreshold. Immutable audit log with before/after deltas on every change. Folder-level ACL — staff see only assigned folders. Consumption analytics with Recharts. Rate-limited PDF reports. Superadmin layer for platform-level oversight. Zod for runtime schema validation. 12 Architecture Decision Records document every major technical choice.

CourtIQ — Basketball Player Development Platform · court-iq.org

React 18 · TypeScript · Firebase · Tailwind CSS v4 · PWA · Recharts · ~20,000 lines

Sports management platform with three user roles (Player, Coach, Manager). Real-time skill tracking, session logging, scouting reports, scheduling, ROI analytics. 176-skill library. Full legal compliance — ToS, Privacy Policy, consent tracking.

MyHours — Personal Time Tracker · [myhours PWA](https://myhours.pwa)

React 18 · TypeScript · Firebase · IndexedDB · jsPDF · xlsx · ~5,700 lines

PWA for freelancers and employees. Multi-workplace GPS auto-detection, hourly rates, overtime multipliers, time rounding (8 settings per workplace). Multi-currency (ILS, USD, EUR, GBP, RUB), PDF/Excel payroll reports. 4 languages with RTL. Offline sync.

Baiti — Building Management Platform · baiti.co.il

Vanilla JavaScript · Firebase (Realtime DB, Auth, Cloud Messaging, Functions) · Tailwind CSS · ~22,000 lines

Apartment building management: payment tracking, tenant admin, voting system, push notifications — no app store required. Built without a JS framework. 30+ iterations from prototype to version 1.0.9. Hebrew, Russian, English with RTL.

METHODOLOGY SYSTEM

24-Document Personal Engineering Library — built incrementally across 6 production projects

Every significant failure, edge case, or architectural decision that mattered became a numbered document. Available to Claude Code at the start of every session — so every new project begins with all lessons from every previous project already encoded. The library includes a 6-stage decision tree (architecture gated before first commit), a session protocol that solves AI amnesia, architecture decision records (StockPilot: 12 dated ADRs), security and launch checklists, and domain-specific guides updated from real production bugs. When WishBasket found two PWA install prompt edge cases, both failures updated the shared library. The next project starts knowing what WishBasket learned.

TECHNICAL SKILLS

Frontend	React 18/19, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite
Backend & Cloud	Firebase (Firestore, Auth, Hosting, Functions, Storage), Node.js, Java SE/EE, JSP, Servlets, JDBC, EJB
Databases	Firebase Firestore, Oracle DB, MySQL, SQL, PL/SQL
PWA & Offline	Service Workers, IndexedDB, Web Manifest, offline-first architecture, auto-update systems
APIs & Libraries	Browser Geolocation, Haversine formula, jsPDF, SheetJS (xlsx), Recharts, Zod, Chart.js
Auth & Security	PIN + bcrypt hashing, device fingerprinting, RBAC, Firestore security rules, session management
i18n	i18next — English, Hebrew (RTL), Arabic (RTL), Russian
Tooling	Git/GitHub, VS Code, Firebase CLI, ESLint, TypeScript strict mode
Legacy/Enterprise	Apache Tomcat, WebLogic, GlassFish, Oracle Application Server

WORK HISTORY

Independent Product Developer

2022 – Present

Self-employed · Israel

Designing, building, and shipping complete production applications solo — full lifecycle from concept through deployment. Six live apps, 83,000+ lines of code.

- Built TimeClock GPS: GPS-verified workforce system, 6 user roles, 5 approval modes, payroll reporting — 18,600 lines, 31 days evenings
- Built WishBasket: family accountability app with peer Request & Promise system and immutable Firestore log — live at wishbasket.app
- Built StockPilot: team inventory with dual consumable/asset tracking, automatic low-stock alerts, 12 Architecture Decision Records
- Built CourtIQ: basketball coaching platform with skill tracking, scouting history, and 176-skill library
- Built Baiti: building management platform with push notifications and multilingual payment tracking
- Built MyHours: personal time tracker with GPS, multi-workplace settings, and PDF/Excel payroll export
- All 6 apps multilingual — Hebrew (RTL), Arabic (RTL), Russian, English
- Developed 24-document personal methodology library — decision trees, ADRs, session protocols — updated from real production failures

Facilities Technician

April 2022 – Present

Palo Alto Networks (formerly CyberArk) · Petah Tikva, Israel

Facilities operations at a global cybersecurity company. Direct exposure to enterprise maintenance workflows and facility management — which directly informed StockPilot and related tooling.

Head Basketball Coach

September 2023 – Present

Hapoel Lod · Israel

Leading program transformation through systematic coaching and data-driven analytics. Strategic game planning combining basketball fundamentals with PPP-based shot efficiency analysis, pick-and-roll coverage effectiveness rankings, and position-flexible player development.

Web Developer / Founder

2014 – 2017

Israweb4u · Israel

Web design, development, and digital marketing for Israeli small business clients. Facebook Ads and Google Ads campaign management.

Java Developer

2010 – 2012

Unlimited Capital Ltd · Israel

Designed and built a Java EE enterprise web application. Secure member registration (SHA hashing), warehouse/order processing system, admin dashboard. Stack: Java SE/EE, Servlets, JSP, EJB, JDBC, Oracle DB, WebLogic, JUnit. Concurrent with Oracle certification — 93% Java SE, 98% SQL/PL/SQL.

IT Administrator / Head Basketball Coach

2007 – 2010

YouthTown · Auckland, New Zealand

Dual role: IT network administration and head coaching for youth basketball program.

Computer Technician / Sales

2005 – 2006

GOLF Computer Company Ltd · Israel

Computer Support Specialist

2002 – 2004

SKORNIK Security Ltd · Israel

Business Owner — PC Parts & Software Store

1995 – 1997

Self-employed · Simferopol, Ukraine

Procured and retailed PC hardware, games, and software. First business ownership experience.

EDUCATION & CERTIFICATIONS

Oracle Certified Professional

2010 – 2012

Oracle Space · Israel

- Oracle SQL, PL/SQL, DBA — Score: 98%
- Java SE 6 / J2EE Certified Professional — Score: 93% (passing threshold: 61%)

Licensed Basketball Coach

2013 – 2014

Wingate Institute — Tel Aviv University · Israel

Professional coaching certification. Certificate No. 13-34-0001908.

Master's Degree — Sport Science

1997 – 2003

Tavrian National University · Simferopol, Ukraine

Specialist of Physical Training (coach, instructor, PE). Diploma No. A 388339.

LANGUAGES

English — Fluent · **Russian** — Native · **Hebrew** — Conversational
